

# DESIGN THINKING X MAKING

EDSGN 397 x ARCH 497

In this course on **Design Thinking x Making**, students will learn in depth about design thinking and making methods through practice [conducting design ethnography, exercising empathy, performing ideation, and reflecting on prototyping and testing] to advance a project of their own framing based on the theme of the semester.

This coming **Spring 2019**, students will be tasked to identify

and frame a challenge related to "**Sustainability on Campus**" [this may be related to food, packaging, transport, recycling practices, water management, energy use, etc.], engage with stakeholders and follow a creative design thinking and making process to prototype and pitch a sensible solution to the challenge they identified and framed.

**SPRING 19 • TUES + THURS: 9:05am-10:25am**  
**ROOM 307 HAMMOND Building**  
**FACULTY: Yasmine ABBAS • [yxa54@psu.edu](mailto:yxa54@psu.edu)**
